

PM-645 ANTICALCÁREO NO PHOS

SEQUESTERING AGENT

PM-645 ANTICALCÁREO NO PHOS: Prevent scaling formation in pool walls and sand filters. It has an excellent stability in chlorinated water which makes its results last longer. It is phosphate free and it is ideal for pools with salt chlorinator equipment.

METHOD OF USE AND DOSAGE

- Initial treatment at the beginning of the season: add 2.5 L/100 m³ in the pool (25 ppm). If the water is very hard, the initial treatment will be 4 L/100 m³ of water (40 ppm).
- Maintenance: the monthly maintenance dose is 1 L/100 m³. In most cases, this quantity is enough. However, if the water is very hard with a high content of minerals, it will be necessary to treat it twice a week.
- Add the product making sure it is well spread in the pool water. For initial and monthly applications, the product can be directly poured into the pool while filtration is on.

PHYSICAL PROPERTIES

- Appearance: whitish liquid
- Odour: odourless
- pH: 13.0 – 15.0
- Density: 1.226 – 1.251 g/cm³

HAZARDS AND PRECAUTIONARY STATEMENTS

- Causes severe skin burns and eye damage.
- Keep locked up and out of the reach of children.
- Wear suitable gloves and eye/face protection.
- In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
