

PM-601 BAJA pH

pH BALANCER

PM-601 pH BALANCER: Acid product in tablets. It is soluble and not dusty. Easy to use, it does not leave any residue. Main properties:

- Acts as an efficient pH balancer.
- Preserves the active chlorine.
- Clarifies water.

METHOD OF USE AND DOSAGE

- Measure pH with a Test-kit
- If the pH is higher than 7.8, add 10 g/m³ of PM-601 BAJA pH to lower pH from 0.2 to 0.4 units.
- It is recommended not to add PM-601 BAJA PH in the pool while carrying out a disinfection treatment. If you cannot do otherwise, add the PM-601 BAJA PH in the pool, at a different point from where you used chlorine products.
- The pool filter must be on when adding this product in the pool. The filter must be working for a least one hour.

PHYSICAL PROPERTIES

- Appearance: White granular solids
- Odour: odourless
- pH: 1.0 – 1.4 (10% solution)
- Relative density: 2.44 (20 °C)
- Melting point: 179 °C
- Decomposition temperature: 460 °C
- Water solubility: 1050 g/L (25°C)

HAZARDS AND PRECAUTIONARY STATEMENTS

- Causes serious eye damage.
- Keep out of the reach of children.
- Avoid contact with skin and eyes.
- Wear eye/face protection.
- After contact with eyes/skin, wash immediately with plenty of water.
