

PM-501 MAXI TRICHLOR GR

WATER SANITIZER

PM-501 MAXI TRICHLOR GR: Trichlorine product containing 90% of active chlorine. It is a highly concentrated algacide and bactericide adapted for pool disinfection.

METHOD OF USE AND DOSAGE

At the beginning of the season:

- Adjust pH between 7.2 - 7.6
- Add 1 – 2 g/m³ of PM-501 MAXI TRICHLOR GR per day and check with the test kit that the free chlorine is between 1 – 1.5 ppm.

Shock treatment:

- If you notice algae, turbidity, chlorine odour, if there are many swimmers coming in the pool or in case of bad weather, add 10 g/m³ of PM-501 MAXI TRICHLOR GR.

Method of use:

- Ceramic coating: it can be added directly by spreading it in the pool.
- PVC or polyester coating: it is recommended to previously dilute it in a water bucket.

PHYSICAL PROPERTIES

- Appearance: white granular solids
- Odour: strong chlorine odour
- Available chlorine: min: 90%
- Humidity max: 0.2%
- pH (solution 1%): 2.7 – 3.3
- Melting point/freezing point: 247°C with decomposition.
- Water solubility (20°C): 14 g/L
- Water Liposolubility: 350 g/L of acetone, 385 g/L of ethyl acetate, 70 g/L of toluene
- Oxidising product.

HAZARDS AND PRECAUTIONARY STATEMENTS

- Explosive when mixed with oxidizing substances.
- Toxic if swallowed. Irritating to eyes and respiratory system.
- Contact with acids liberates toxic gas.
- Very toxic to aquatic organisms.
- Warning! Do not use together with other products. May release dangerous gases (chlorine).
- Keep out of reach of children.
- Store in a dry place
- Wear suitable gloves and eye/face protection
- In case of accident or if you feel unwell seek medical advice immediately (show the label when possible).
- If case of fire, use water to extinguish it.
- Dispose of contents/container to the collection point in accordance with local/regional/national/international regulation.

PACKAGING

Packed in 1, 5 and 25 Kg
